Health Information Management

Dr Kellogg
Health Information and Technology
Department Chair

What is Health Information Management?

Health Information Management (HIM) is the profession of acquiring, analyzing, and protecting digital and traditional medical information vital to providing quality patient care. HIM professionals are highly trained in the latest information management technology applications and understand the workflow in any healthcare provider organization from large hospital systems to the private physician practice. They are vital to the daily operations management of health information and electronic health records.

Where could you work with a Degree in Health Information Management?

Employment opportunities exist for the health information professional in any industry that utilizes patient data. Health information careers are found in a variety of settings including but not limited to: healthcare facilities, consulting firms, government agencies, insurance companies, healthcare vendors, pharmaceutical companies, as well as many other settings.
