

**NEOSHO COUNTY COMMUNITY COLLEGE
MASTER COURSE SYLLABUS**

COURSE IDENTIFICATION

Course Code/Number: MFGT 116

Course Title: Gas Tungsten Arc Welding

Division: Applied Science (AS) Liberal Arts (LA) Workforce Development (WD)
 Health Care (HC) Lifetime Learning (LL) Nursing Developmental

Credit Hour(s): Three (3)

Effective Date: Fall 2013

Assessment Goal Per Outcome: 75%

COURSE DESCRIPTION

In this course students will explore the tools, safety and operating procedures essential when working with Gas Tungsten Arc Welding equipment. In a supervised setting, students will set up equipment, build weld pads with selected electrodes and filler materials in both the flat and horizontal positions. Students will also weld selected joints and inspect GTAW welds for uniformity and tolerance.

MINIMUM REQUIREMENTS/PREREQUISITES AND/OR COREQUISITES

NONE

TEXTS

The official list of textbooks and materials for this course is found on *myNeosho*.

<http://www.neosho.edu/ProspectiveStudents/Registration/CourseSyllabi.aspx>

GENERAL EDUCATION OUTCOMES

1. Practice Responsible Citizenship through:
 - identifying rights and responsibilities of citizenship,
 - identifying how human values and perceptions affect and are affected by social diversity,

- identifying and interpreting artistic expression.
2. Live a healthy lifestyle (physical, intellectual, social) through:
 - listing factors associated with a healthy lifestyle and lifetime fitness,
 - identifying the importance of lifetime learning,
 - demonstrating self-discipline, respect for others, and the ability to work collaboratively as a team.
 3. Communicate effectively through:
 - developing effective written communication skills,
 - developing effective oral communication and listening skills.
 4. Think analytically through:
 - utilizing quantitative information in problem solving,
 - utilizing the principles of systematic inquiry,
 - utilizing various information resources including technology for research and data collection.

COURSE OUTCOMES/COMPETENCIES (as Required)

1. Explain the gas tungsten arc welding process (GTAW)
 - a. You will demonstrate your competence:
 - i. through an instructor-provided written or oral evaluation tool
 - b. Your performance will be successful when:
 - i. you differentiate between types and uses of current
 - ii. you identify the advantages and disadvantages of GTAW
 - iii. you identify types of welding power sources
 - iv. you identify different components of a GTAW workstation
 - v. you describe basic electrical safety
2. Demonstrate the safe and correct set up of the GTAW workstation
 - a. You will demonstrate your competence:
 - i. in a lab or shop setting
 - ii. using a GTAW workstation
 - b. Your performance will be successful when:
 - i. you demonstrate proper inspection of equipment
 - ii. you demonstrate proper use of PPE
 - iii. you demonstrate proper placement of workpiece connection
 - iv. you check for proper setup of equipment
 - v. you inspect area for potential hazards/safety issues
 - vi. you troubleshoot GTAW equipment and perform minor maintenance
3. Relate GTAW electrode and filler metal classifications with base metals and joint criteria
 - a. You will demonstrate your competence:
 - i. through a written or oral examination
 - b. Your performance will be successful when:
 - i. you identify electrode classifications
 - ii. you explain the AWS electrode and filler metal nomenclature
 - iii. you determine proper electrode and filler metal for given joint based on material and position of weld
 - iv. you determine proper type of electrodes to be used in a variety of industry applications

4. Build proper electrode and filler metal selection and use based on metal types and thicknesses
 - a. You will demonstrate your competence:
 - i. in a lab or shop setting
 - ii. using GTAW equipment
 - iii. using appropriate tools
 - b. Your performance will be successful when:
 - i. you use safety hazard precautions and PPE
 - ii. you properly prepare the tungsten electrode profile relative to base material
 - iii. you perform weld using GTAW process appropriate to electrode size and filler metal size
 - iv. you select the proper electrode and filler metal type and size relative to metal size, type and thickness
 - v. you select the proper electrode and filler metal type and size based on material specifications
 - vi. you use tools appropriate for the task
5. Build pads of weld beads with selected electrodes and filler material in the flat position
 - a. You will demonstrate your competence:
 - i. in the lab or shop setting
 - ii. using GTAW equipment
 - b. Your performance will be successful when:
 - i. you use safety hazard precautions and PPE
 - ii. you demonstrate proper equipment setup and troubleshooting
 - iii. you create a pad of beads using GTAW process
 - iv. your weld exhibits proper uniformity and profile
6. Build pads of weld beads with selected electrodes and filler material in the horizontal position
 - a. You will demonstrate your competence:
 - i. in the lab or shop setting
 - ii. using GTAW equipment
 - b. Your performance will be successful when:
 - i. you use safety hazard precautions and PPE
 - ii. you demonstrate proper equipment setup and troubleshooting
 - iii. you create a pad of beads using GTAW process
 - iv. your weld exhibits proper uniformity and profile
7. Perform basic GTAW welds on selected weld joints
 - a. You will demonstrate your competence:
 - i. in the lab or shop setting
 - ii. using GTAW equipment
 - iii. using appropriate tools
 - b. Your performance will be successful when:
 - i. you conduct proper base metal preparation
 - ii. you use safety hazard precautions and PPE
 - iii. you demonstrate proper equipment setup and troubleshooting
 - iv. you perform fillet weld in flat position
 - v. you perform a fillet weld in horizontal position

- vi. you perform a groove weld in a flat position
 - vii. you perform a groove weld in a horizontal position
 - viii. you use tools appropriate for the task
8. Perform visual inspection of GTAW welds
- a. You will demonstrate your competence:
 - i. in the lab or shop setting
 - ii. using proper inspection tools
 - b. Your performance will be successful when:
 - i. you identify common visual discontinuities and defects on welds
 - ii. you determine causes of discontinuities and defects of welds
 - iii. you inspect welds for pass/fail ratings according to industry standards
 - iv. you use tools appropriate for the inspection

MINIMUM COURSE CONTENT

Minimum course content is reflected in the competencies under each outcome. Additional content may be added.

STUDENT REQUIREMENTS AND METHOD OF EVALUATION

Evaluation of student performance is determined primarily from results of written and performance tests to validate mastery of course competencies. Due to the nature of the class, student participation, teamwork, courtesy, honesty, and adherence to safety policies are required. Students are required to take the 3rd party testing examination.

Safety and Health examination must be passed at 90%

GRADING SCALE

On objective materials, the following scale is used:

90-100 %	A
80-89 %	B
70-79 %	C
60-69 %	D
0-59 %	F

Student competence is achieved by obtaining a minimum of 75% on written tests and by passing visual inspections.

American Welding Society standards will be applied when accessing lab work. Students must meet AWS levels of competence to pass the course.

ASSESSMENT OF STUDENT GAIN

Students will be assessed through written testing. Practical application will be assessed on the first attempt at the skill and again at the conclusion of the course. Comparison will determine the extent of student gain.

Attendance Policy

1. NCCC values interactive learning which promotes student engagement in the learning process. To be actively engaged, the student must be present in the learning environment.
2. Unless students are participating in a school activity or are excused by the instructor, they are expected to attend class. If a student's absences exceed one-eighth of the total course duration, (which equates to one hundred (100) minutes per credit hour in a face-to-face class) the instructor has the right, but is not required, to withdraw a student from the course. Once the student has been dropped for excessive absences, the registrar's office will send a letter to the student, stating that he or she has been dropped. A student may petition the chief academic officer for reinstatement by submitting a letter stating valid reasons for the absences within one week of the registrar's notification. If the student is reinstated into the class, the instructor and the registrar will be notified. Please refer to the Student Handbook/Academic Policies for more information
3. Absences that occur due to students participating in official college activities are excused except in those cases where outside bodies, such as the State Board of Nursing, have requirements for minimum class minutes for each student. Students who are excused will be given reasonable opportunity to make up any missed work or receive substitute assignments from the instructor and should not be penalized for the absence. Proper procedure should be followed in notifying faculty in advance of the student's planned participation in the event. Ultimately it is the student's responsibility to notify the instructor in advance of the planned absence.

ACADEMIC INTEGRITY

NCCC expects every student to demonstrate ethical behavior with regard to academic pursuits. Academic integrity in coursework is a specific requirement. Definitions, examples, and possible consequences for violations of Academic Integrity, as well as the appeals process, can be found in the College Catalog, Student Handbook, and/or Code of Student Conduct and Discipline.

ELECTRONIC DEVICE POLICY

Student cell phones and other personal electronic devices not being used for class activities must not be accessed during class times unless the instructor chooses to waive this policy.

NOTE

Information and statements in this document are subject to change at the discretion of NCCC. Students will be notified of changes and where to find the most current approved documents.

ACCOMMODATIONS

If you are a student with a disability who may need accommodation(s), in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act (ADA) of 1990, please notify the Dean of Student Services in the Student Services Office, Sanders Hall, 620-432-0304, on the Chanute Campus, or the Dean for the Ottawa and Online Campuses, 785-248-2798, on the Ottawa Campus as soon as possible. You will need to bring your documentation for review in order to determine reasonable accommodations, and then we can assist you in arranging any necessary accommodations.

NON-DISCRIMINATION POLICY

The following link provides information related to the non-discrimination policy of NCCC, including persons with disabilities. Students are urged to review this policy.

<http://www.neosho.edu/Departments/NonDiscrimination.aspx>

SEXUAL MISCONDUCT POLICY (TITLE IX)

At NCCC, it is the responsibility of an instructor to help create a safe learning environment in the classroom, including both physical and virtual classrooms. All instructors are considered mandatory reporters at NCCC, therefore any information regarding sexual misconduct that is shared by a student in one-on-one meetings with the instructor must be reported to appropriate personnel at the College. Instructors will keep the information private to the greatest extent possible, but it is not confidential. Generally, climate surveys, classroom writing assignments or discussions, human subjects research, or events such as Take Back the Night events do not provide notice that must be reported to the Coordinator by employees, unless the reporting party clearly indicates that they wish a report to be made.

The following link provides information related to the sexual misconduct policy of NCCC, including resources, reporting options, and student rights. Students are urged to review this policy.
